Kamlesh Rathod

Aspiring IT engineering student with a focus on mastering Cybersecurity and Development. Committed to applying these technical skills alongside problem-solving and innovation, my goal is to contribute to technological progress with a keen emphasis on ethical and secure solutions.

Project's

Share Market Indicator

Developed and enhanced a custom trading indicator in Pine Script on TradingView, incorporating features like SMA/EMA choice, histogram with dual colors, and buy/sell signals based on MACD and signal line crossovers.
Feb 2024

Wildvine

Developed the frontend for Wildvine, a wild animal donation platform. Utilized HTML, CSS, and Bootstrap to create an engaging and responsive user interface for seamless donation experiences.
Dec 2023 - Jan 2024

Intrusion Detection System (IDS)

Created an Intrusion Detection System with OpenCV for video analysis, detecting suspicious activities. Integrated Twilio API for real-time alerts, showcasing skills in computer vision, Python, and communication integration.
Sep 2023 - Oct 2023

College Event Management

Designed and implemented College Event Management using HTML, CSS, and PHP. Developed a dynamic platform for organizing and managing college events, showcasing skills in web development and server-side scripting.
Jan 2023- March 2023
